

# COMPANY PROFILE

---

Marco Arrigoni Srl is an Italian fashion house that was born in 2017 from the desire of its namesake to offer products that respect two fundamental elements:

- 1) are handcrafted with 100% natural yarns.
- 2) are an expression of Italian excellence and creativity.

Marco Arrigoni bases its foundations on craftsmanship and the quality of raw materials.

Italian dexterity and craftsmanship shine in the beauty of our products and best represent our identity.

Our garments are designed and packaged entirely in Italy by the expert hands of our knitters.

# RAW MATERIAL

---

Marco Arrigoni attaches fundamental importance to raw materials, which are the basis of product quality. Their supply takes place directly from the company personnel who directly select the suppliers by applying the criterion of the highest quality. The raw materials are subjected to internal checks before being processed.

90% of our suppliers are based in Italy. Only the Alpaca yarn is purchased directly from the Andes (Peru). The choice is dictated exclusively by the qualitative superiority offered by the Andean suppliers.

# STYLE AND CREATI VITY

---

We strongly believe in the creative and manual skills that distinguish our country in the world. Creativity is the basis of our production process. The creative process is based on a constant research activity and a continuous comparison with tradition.

With an innovative approach we try to modernize the tradition.

Society changes, styles change, we evolve accordingly.

The simple and the classic are deliberately twisted and revisited, in a constant search for new shapes and perspectives.

Our knitwear is the perfect combination of traditional skills with innovative style and shapes.

# OUR MISSION

---

We care about the environment that surrounds us. This is why we only select a natural raw material of the highest quality that can guarantee a product that lasts for a very long time.

We care about the people who work with us. We strongly believe in the creative and manual skills of our collaborators.

For this reasons, our garments are made in full respect of the moral and economic dignity of the human resources who work directly for the company, and for all those who collaborate with it.
